I have a number of pictures in JPEG and as is the case the JPEGs are all named as 001,002 etc. I am looking for a way to easily change the names of the files/pis easily by using some kind of a merge program. My thought is to create a new name in an excel spreadsheet for each of the files. Then somehow use that file to create new names for the pics.

Would appreciate any help. This will save me hours of work.

John

John,

ACDSee v3.10 is not only a great program for viewing pictures, but it has a rename file/s feature. You can select multiple files and rename with a click of the mouse. ACDSee v3.10 is by far the best and simplest version release. Get it here <http://www.oldversion.com/program.php?n=acdsee>

here is the serial needed:  
132728175249781441

Enjoy,
