Hi:

HP All-in-One has a lot of problems.

I'm one of those who have been struggling with this issue.

You can see very clear picture on this problem, if you read many of posts regarding HP printers on this board.

At least, you're NOT only one.

For some reason, other users on my computer cannot access the printer {HP psc2175v all-in-one}. I have the printer setting marked as 'share this printer', but nothing. Now, this is not a LAN issue.....I am not

networked

with any other outside computer. This is pertaining to other user accounts

on

my machine. I'm not sure what more to do to enable the sharing feature.

Help?

.
