"It has been a few months since it has printed correctly and the ink was empty for a week before I changed it"

You may be buying a new printer. Usually, the out of warranty repair cost is at least equal to the cost of a new printer. Having said that— Some printers have a fixed head that can clog if it sets for an extended period of time. Especially if the tanks are empty. It may be possible to clear the clog if you can get to the head printing surface. Some of the printers have easily accessible heads, others do not. Will the printer run a nozzle check? Have you tried the head cleaning sequence in the driver options?

It has been a few months since it has printed correctly and the ink was empty

for a week before I changed it. That's when it started not printing.

When was the last time it printed correctly? Did you leave it a few weeks

without printing... and if so, was the ink empty at that time?

Re: Epson cx4600 ink not printing on paper

My Epson cx4600 is not printing properly. I have new Epson ink, Have

gone

through all troubleshooting three times, everything is connected okay, when I try to print or photocopy anything the printer sounds and acts like

all is

well, but no ink is on the paper. What is up? Help!! My warantee is up

so

EPSON will not help.

.
