Paul, Alan,

This was the very first thing I did when I thought of MOM being able to use DAD's printer. I tried network connection 3 ways – using the XP cd, going to control panel>network setup wizard and also going to all programs>accessories>communications>network setup wizard

"Paul Baker [MVP, Windows – Networking]" wrote:

Alan, I mentioned this in my list of suggested steps on 2/5. Johnnie, I looked over your answer again and you said that sharing was on on both computers, but you did not say how you determined that. The Network Connection Wizard, which I think is what Alan is referring to, does more than just simply turn sharing on or off. For example, it adds a File and Printer Sharing exception to the Windows Firewall configuration. In any case, this has helped me in the past with these kinds of problems.

Again, one way to get to it is via All Programs > Accessories > Communication.

Paul

have you run the network wizard on both machines? It's somewhere in the networking control panel.

Alan,
launched gpedit.msc on DAD, enabled allow print spooler to
accept client
connections. went to MOM, added printer, still the printer is
not
visible.

"Alan Morris [MSFT]" wrote:

Is the remote printers folder visible on
DAD? If not then the RPC
endpoint
is not open to the remote clients.

This setting is supposed to be enabled (and
the proper firewall ports
opened) when one shares a printer.

launch gpedit.msc on DAD

Computer, Administrative Templates,
Printers
Enable
Allow Print Spooler to accept client
connections

stop and start the spooler service or reboot.

Re: Computer does not recognize printer attached to another comput

Alan,

Yes, the first in the list is
LanMan Print Services.

"Alan Morris [MSFT]"

Alan,
Yes,
the
group
'Everyone'
shows
on
DAD's
printer
security
tab.
On
MOM's
it
doesn't
show
since
I
don't
have
a
printer
yet
that
could
show
the
security
tab.

I
would
proceed
as
follows.
After
each
change,
test
it.
If
it
fails,
reboot
both
machines
and
test
it
again.
If
it
still
fails,
move
on
to
the
next
step.
If
it
succeeds,
take
note
of
which
step
fixed
it
for
the
benefit
of
others
that
may
be
in
a

Re: Computer does not recognize printer attached to another comput

Re: Computer does not recognize printer attached to another comput

does
not
see
the
printer
that's
attached
to
DAD's
computer.
The
structure
shows
this:
-
Microsoft
Network
Group
-
DAD
-
MOM
I'm
expecting
to
see
a
printer
under
DAD
that
I
could
use,
but
there's
no
printer
name.
Could
anyone
shed
some
solution?
