Convert any documents(Word, Excel) into BMP, GIF, JPEG, PNG and TIFF image

Website: <http://www.joyprinter.com>

Joy Image Printer is a high-performance virtual printer which enables you to convert any printable document into standard BMP, GIF, JPEG, PNG and TIFF image, and keep the exact look and feel of the original document. Since the converted image has the complete information from the original file without altering characters or fonts, you don't need to install the original software to view the document.

Key Features:

(1) Installs as a standard Windows printer, works for all Windows applications directly

It is designed to integrate legacy windows-based devices into a standard PACS architecture. Joy Image Printer installs as a standard Windows printer driver and takes the printed output from any application and convert it to Image.

(2) Converts any printable documents like doc, xls, ppt, rtf, html and CAD into images

It converts Html documents, Microsoft Word documents, Microsoft Power Point presentations, Excel Spreadsheets, Adobe PDF files, Autodesk AutoCAD drawings and any other printable documents into PNG, TIFF or JPEG easily!

(3) Supports BMP, GIF, PNG, JPEG and TIFF formats

You can save output image to BMP, JPG, GIF, PNG, TIFF format easily with the configuration GUI.

(4)Creates Thumbnails for Printing document

It could create thumbnail images for the printing documents, and control the size of the thumbnail image

(5)Dynamic file and folder generation based on macros

Macro commands are designed to allow flexible ways to define how to generate the file and folder name. It supports more than 20 macro commands right now.

(6)Flexible DPI Settings

The DPI(dot per inch, resolution) defines the number of pixels that can fit into an inch of space. The higher the DPI, the better the image quality. You may specify the image resolutions between 50 x 50 and 2400 x 2400 dpi.

(7)Supports custom color: Black & White or True color

The documents can be converted to monochrome or color/grayscale images.

(8)Supports custom JPEG compression settings

You can specify the desired quality of the JPEG compression level, it's between 2 and 100, the higher, the better quality.

(9)Supports transparent GIF images

It could support Transparent Background GIF images.

(10)Supports both single and multi–page TIFF file formats

You can specify whether to save each page in a individual TIFF image file, or save to a single multi–page TIFF file.

(11)Supports Windows Vista

The Joy Image Printer is compatible with Windows 2000/2003/XP/XP SP2/ Vista.
