Cari Hi,

I just added a fresh install of vista Ultimate. I just bought a cannon pixma

mp530 with the latest Vista Drivers. The driver will not even install for the

first time. When I run the driver CD, It tells me right away that the "It cannot instal this software because the print spooler will not run". Then tells me to restart the computer or the spooler. The spooler is set to auto,

But when I hit start in services, It comes back with an error 1067, It tell

the process has terminated unexpectedly. Could there be something wrong with

my Vista Cd? Or can I remove the spooler somehow and replace it? I am at my

wits end here.

Re: Print Spooler

Did you actually check the printer manufacturer's website for drivers?
What
make and model of printer?

I have the same problem, spooler subsystems just keeps
stopping, my
notebook
is a brand new toshiba, with Windows Vista home premium
preloaded from
the
manufacturer. Im this far from going back to XP any help..
of what
might
really be causing this problem this was no update or drivers
proviosly
installed this is is a brand new computer..

Anyone find a definitive
answer to this one yet? I'm
still having
the
same
problem...on two
workstations now.

Thanx.

I cannot
print. I
cannot add
a printer.
The Print
Spooler is
set
to
start
automatically
but does not
stay started.
If I restart
the Spooler
Service,
it only
remains
running
until I try to
add a
printer, then
the Add
printer
wizard
won't run,
reports error
"the
operation
could not be
completed,"
and
the Spooler
Service is
stopped. I
have tried
system
restore, I
have
edited
the registry
and deleted
the
Version-x
subkeys and
extra
monitors,
I

Re: Print Spooler

have
tried
logging in
on a
new/different
user
account...nothing
worked.
Any
clues?
