| I installed a new HD and loaded a 2nd XP on it. When I
| start Windows it takes me to a screen to choose which OS
| to boot too. I can choose either one and both work fine.
| I finally got everything copied and set up on my new
| drive and would like to delete the first OS on my old
| drive, removing the choice at startup and then reformat
| it to use for storage of files.

| Can anyone tell me how to do this correctly?
| Thanks a bunch!
