I typed this in Google:

"Windows XP" "Service Pack" download

and I got this address:

<http://www.microsoft.com/technet/prodtechnol/winxppro/maintain/winxpsp2.msp>

The options on this page are:

- Download and Deploy Service Pack 2 to Multiple Computers
- Download and Install Service Pack 2 on a Single Computer
- Order the Service Pack on CD Order the Service Pack on CD

It seems the first option would fit your requirements quite nicely.
