<>
<> 'User must change password at next logon'
<>
< – – –
<Yes, I have the option but that is neither the question nor the problem..
<
<AT LOGON
<IF an admin's password has expired
<
<THEN the dialog box asks them if they want to change it.
<IF they answer YES it gives them the dialog to change the password and
<continues on to the desktop once the password change scenario is complete.
<ELSE they answer NO and it continues to the desktop.
<
<I want to configure it so that IF they answer NO, THEN it does NOT
continue

Re: When ADMIN PASSWORD has expired – stop ability to bypass chang

<until they answer YES.

<Effectively enforcing that they MUST change their password if it has expired.

<

<I don't think it's possible in the Windows World...
