Reply to message from Jake <Jaker00at@xxxxxxxxxx> (Wed, 04 Jan 2006 17:29:36) about "VPN Endpoint tunnel connected but can't connect to RD":

- > Hello,
- > I've been struggling with a problem that I hope someone can help with.
- > I've got two Linksys VPN routers (BEFSX41 ~ BEFVP41) that I have established a tunnel
- > between over the internet.. The tunnel is connected and stays connected so that's
- > apparently not the problem.
- > I am trying to reach a Windows XP Pro machine behind BEFVP41 from another Windows XP
- > Pro machine behind BEFSX41. I am getting the dreaded "REMOTE DESKTOP DISCONNECTED" –
- > "The specified remote computer could not be found".
- > I've configured the tunnel to pass NetBIOS traffic on both ends.
- > I've tried entering the IP address of the destination machine in the RD client
- > connection dialog.
- > I can connect to the destination machine from another XP Pro machine that's on the same
- > LAN using the machine name.. So the RD configuration is ok.
- > The destination site has DSL and the modem (Speedstream 5660) is in bridge mode so that
- > the BEFVP41 is getting the WAN IP from the ISP. Everything else works ok.
- > I have this same setup working fine with another configuration so I'm stumped about
- > what else to look at.
- > Any ideas ?
- > Thanks
- > Bryan

Can you ping the PC by using its IP?

Also make sure the two sub-nets are different, ie. one 192.168.1.X versus 192.168.2.X for

Re: VPN Endpoint tunnel connected but can't connect to RD

example...

Al Jarvi (MS-MVP Windows Networking)
