- 

Every time I try to open this, it refreshes the page. Desktop icons disappear, leaving only the background wallpaper and then reappear as if I hadn't tried anything. Has anyone heard of such an event? Event Viewer has no errors, I tried to reinstall the rundll.exe from CD as mentioned in a Microsoft online help doc, did a cfs /scannow, nothing happened, used Ashampoo Winoptimizer 2002 to clean the registry, all of which have not solved the issue.

Any further help greatly appreciated.

.
