Many thanks, I am thinking this also. i have tried safe modes and system restore and all is well until i switch off and log back on again and 'there it is' again. Don't know what to do next, new hard drive ha ha????

Regards ,

tim

I keep getting 2 error readings every time i start up windows XP Service pack 2

Both are telling me that it cannot find the following file in the registry.

C:\WINDOWS\system32\awtqp.exe

Can anyone help please?

regards

Tim

I googled for "awtqp.exe" and got the impression that this file is related to a virus.
