Nevermind!

scriptname.vbs //B

supresses errors.

>> Hi Carl O,
>>
>> Sorry Carl, my mistake for not add any comments in code.
>>
>> Assume the follwing cenario:
>>
>> Domain name = XPTO
>> Domain Global Security Group = ITTechnicians
>>
>> Purpose = add ITTechnicians Domain Group to Administrators Local Group
>> '-----
>> Set wshNetwork = CreateObject("WScript.Network")
>> ComputerName= wshNetwork.ComputerName
>>
>> localstr="WinNT://" & Computername

Re: Group Policy questions

```
>>
>> 'Get domain group and assigned to ITTechs Variable
>> ITTechs="WinNT://XPTO/ITTechnicians"
>>
>> 'Add Domain Group to Administrators Local Group
>> AddToGroup ITTechs, "Administrators"
>>
>> Function AddToGroup(member, Grpname)
>>
>> Dim grp1
>> Set grp1 = Getobject(localstr&"/"& Grpname,group)
>> grp1.Add (member)
>>
>> End Function
>> '-----
>>
>> Please let me know if you have some questions.
>>
>> Regards,
>
>
```
