You can do this by writing your own password filter, or by purchasing one.

To write your own:

[http://msdn.microsoft.com/library/default.asp?url=/library/en-us/secmgmt/security/password\\_filters.asp](http://msdn.microsoft.com/library/default.asp?url=/library/en-us/secmgmt/security/password_filters.asp)

We sell a configurable password filter that allows you to restrict your password policy to specific users, groups, and OUs:

<http://www.anixis.com/products/ppe/>

.
