So you disabled or unlinked the GP correctly from the OU? Where does the policy come from, if so?

On a client, try "Help and Support" −> Click "System Information" at "Tools − Locate tools like System Information..." −> Click "Advanced System Information" at the left panel under "Tools − Help and Support Center Tools" −> "View Group Policy Settings applied".

This should give you an idea, where the policy comes from and where to disable it...

cheers,

Florian
