Have a look at both share and NTFS permissions. They both need to be right in order to have the computers reading the package.

> "Is the Group Policy linked anywhere in AD?" Not sure what you mean by this?

How did you create the policy? By using the Group Policy Editor after right−clicking a Organizational Unit in Active Directory Users and Computers? If so, it should be linked well. Are there computer accounts in the OU you created the policy at?

You can use the rsop.msc tool by running it from Start−>Run from a client that should receive the policy.

cheers,

Florian
