Hello Roe,

Please post the complete errors from the event viewer here. Or is it running now?

Best regards

Meinolf Weber

ok I found the problem but I don't know why this is do this.

I add template in the past and configure it and remove it. the fix that I do is add again the template and not configure it and remove it the problem is fixed!

in the event viewer is saw smothing about userenv registry.pol parameter error

this is fixed with the remove of the template.

Hello Roe,

Check that the policies are applied with gresult or rsop on the client.

Best regards

I do this but the firewall is not disabled or grayed to lock
from
changes what can I do more?

Hello Roe,

Create and configure a GPO with the
firewall setting you like to
have, link it to the OU where your
computers are in.

hi how can I ensure that the
computer firewall is
disabled and
locked from changes on
this?

how to do this right?
