Hello Manfred,

Also find out now, that i was totally wrong about the syntax.

Best regards

Meinolf Weber

Have it,

the correct syntax is

ofrs://{\*}/server/share/\*

...

Hello news.microsoft.com,

To connect to the remote machine try this one:

\\servername\share

Best regards

Re: Group Policy for Windows Search

Hi Meinolf,

i dont want to index a local folder.

I want to index a remote machine, where an index exists.

So if I add an index in Windows Search, it works well, but not when

I

specify the path in the Group Policies.

Manfred

Hello news.microsoft.com,

You have to specify the path to the folder which you will index.

C:\test

D:\test

Best regards

Hi,

I want to apply a "Default Indexed Path" to Windows Search 4.x.

Computer – Administrative

... – Windows Components

– Search –

Default

Indexed Paths

I used following syntax, but

it doesnt work

file://server/share/\*

What is wrong?
