Hello,

I have enabled verbose logging on clients.
You will find below the appmgmt.log file of a client. However I don't understand why assigned applications through GPO are removed and then re-installed.

<!-- Begin of Appmgmt.log -->

Software installation extension has been called for background policy refresh
Software installation extension has detected changes that require a synchronous foreground policy refresh.

Software installation extension returning with final error code 1274.

08-07 12:39:27:531

Software installation extension has been called for foreground synchronous policy refresh.

The following policies are to be applied, flags are 1.
