How to download the complete installation package of IE?

<http://www.mvps.org/sramesh2k/IEFAQ.htm>

Never tried these sites, one of these have the full version downloads.

Tried repairing/reinstalling IE.

Did not help, in the error signature, the ModName is msrating.dll

The spyware was NRPR.exe "NetRat"

Anything else I should look for?

>When you click the Internet Explorer icon, window may flash a second and quits. Or, it may show an Error-Reporting dialog. This may be due to a malware Browser Helper Object which causes Internet Explorer process to terminate. If you see the Error-Reporting dialog, click "to see what data this report contains" and identify the Module Name causing this error. In most cases, it may be the spyware DLL. Therefore, reinstalling Internet Explorer [in case of a spyware DLL] may not

help.
