Lately I have been having serious trouble with my Internet Explorer. If I try to use it, I automatically get a window that tells me that it has done an illegal operation. So I hit the close button so that Internet Explorer can shut down. But then I get a second window that tells me again about some error that has occurred with Microsoft Internet Explorer and if I still have trouble, I should restart my computer. Even when I try to open some folders on my desktop, such as My Computer and the Recycle Bin, I just get the illegal operations warning for Explorer. What's going on exactly? I haven't downloaded anything new (except for IE 6.0 today) and I haven't opened any attachments from e-mails. Is there some virus that I don't know about? Please help, this is very frustrating!
