If applicable check this out.

Fix if This problem occurs after you apply the 832894 security update (MS04-004) or the 821814 hotfix.

<http://support.microsoft.com/?kbid=831167>

SYMPTOMS

Programs that use Wininet functions to post data (such as a user name or a password) to a Web server retry the POST request with a blank header if the Web server closes (or resets) the initial connection request.

--

Some other issues,

Cannot Open, Display, find - errors

<http://www.generation.net/~hleboeuf/canotofd.htm>

Try a XP group if no joy.
