First eliminate any scumware.

See

Dealing with Unwanted Malware, Parasites, Toolbars and Search Engines

<http://mvps.org/winhelp2002/unwanted.htm>

Note that AdAware and SpyBot S & D will each catch some things the other
won't. Also, each needs to be updated with the program's update function
before every use, even when just downloaded. There's also a lot more to do
than just those two programs. CWShredder is also available here:

http://www.kellys-korner-xp.com/regs_edits/cwshredder.zip

**Post your HijackThis log to

<http://forums.spywareinfo.com/> or the Spyware forum at

<http://forum.aumha.org/> for expert analysis, not here.**

Alternative download pages for Ad-Aware, Spybot, HijackThis and CWShredder
may be found on this page:

<http://aumha.org/a/parasite.htm>.

If trying everything at that site does not fix the problem please post back
in the same thread.
