Check these out.

When I go to 'Tools' 'Internet Options' I get the following error:  
This operation has been cancelled due to restrictions in effect on this computer. Please contact your system administrator.

If you have SpyBot S & D installed, go to SpyBot – Search and Destroy Immunize, and UNcheck the "Lock IE Control Panel..." box.

If you have troubles with your browser not having all the controls in the expected places download and run this .reg file.
