Hi Roxanne – Did you try re-installing it to it's original condition?

If you wish to restore Content Advisor to its original condition (because of your kids) you can obtain a Microsoft program (CA-Reset.exe – 89.5K) to do this here: http://www.kellys-korner-xp.com/regs_edits/CA-Reset.exe (listed on line 283) NOTE: Using CA-Reset will completely delete your Approved List – everything starts like brand new, so consider this before you use it.

--

Please respond in the same thread.

Regards, Jim Byrd, MS-MVP
