Because of the conflict between Sun and MS, the Java VM may not have been installed in the new XP box.

Where to get the Java VM

http://www.mvps.org/inetexplorer/answers_9.htm

Check your Java Support

Found out what version you have and you should be able to get what you need.

<http://www.visualware.com/support/javasupport.html#windows>

Check your Java Support

Found out what version you have and you should be able to get what you need.

http://n6hb.org/s-a/JAVA-ts.htm#ie_jvm
