Check your File type association.
Remove the "Confirm open after download" box

Do not have access to a W2000 but I think you will be able to locate the option.

This is what you would do if you wanted the prompt.

Quote

You set this for each file type, e.g. for .zip
Explorer-View-Folder Options-File Types
Find the .zip association (may be WinZip File)
Edit, (or click Advanced on ME or XP) and check the "Confirm open after download" box

The path to Folder Options may vary according to your operating system. It may be:

Explorer-View-Folder Options
Explorer-Tools-Folder Options
Start-Settings-Folder Options
Start-Settings-Control Panel-Folder options.
