try restore, or try deleting all accounts but the admin account and start over. and check for malware/adware

>-----*Original Message*-----

>*There are four different accounts on my computer and I have Windows XP, Home*

>*Edition.Three of those four accounts can connect to the internet, but not*

>*access it.One account works perfectly fine.When opening Internet Explorer on*

>*one of the three accounts a "cannot display page" message appears.I have*

>*pinged the IP address and the internet is connected.It may be the Winsock*

>*files, but I don't really understand that.I do have two files both named*

>*"winsock.dll" but i renamed one, and still, no change.Please, any help at all*

>*would be greatly appreciated. Thankyou for your time.*
