there are a few sites that i go to, namely the journey planner section of www.tfl.gov.uk and the login to www.neteller.com , and a site i want to browse www.1808gang.com

Anyways the problem is, i go to the site and IE is downloading it, and then it closes IE altogether. I say it may be java related, because i went to oneof the sites on my friends pc and it said you need to download java... which I have.

Any advice?

Yours

Sam Newman
