Nope. That fix just resets the toolbar placement settings in the registry.
(used when one of the toolbar has gone off position etc).

i suspect it has something to do with a spyware registry
key or something since ie also opens some pop-ups. virus
scan is clean, spyware scan is clean.

perhaps this will help restore the keys???:

<http://mvps.org/sramesh2k/req/IEToolbar.req>

thanks for the help, btw.
