To say the least!! Now that you know that it will not help the situation, I suggest that for the time being, you leave it uninstalled until we can find out what is causing the problem you are now having. And.....before you decide to reinstall it, here is some very important information you might wish review prior to installing.

All About Xp SP2

<http://inetexplorer.mvps.org/XPSP2.htm>

> *However, the problem persists so it must be something else. The fact
> that the windows open fine with Netscape indicates a IE6 problem.*
>
> *There is no error message – the window opens and then just closes
> straight away. It is not restricted to the BBC site – all user
> initiated javascript windows behave the same.*

'k...I've just gone to the <http://news.bbc.co.uk/1/hi/uk/default.stm> link and opened the Watch/Listen window, and all is fine for me. (<g>)

Now....were things working properly before you installed the SP2? Were you able to access the Watch/Listen window alright before then? If things were working fine, and now they aren't, there may have been a corruption of some of the JavaScript files for IE with the install of SP2.

Try the following that applies to your system, and see if they will help:

microsoft.public.windows.inetexplorer.ie6.browser: Re: IE PopUp Windows won't open with SP2

You cannot open a new Internet Explorer window or nothing occurs after you click a link

<http://support.microsoft.com/default.aspx?scid=kb;EN-US;281679>

also.....

Script Debugging Problem

Open IE

Tools | Advanced

Under Browsers:

Disable Script Debugging – Check it

Display a notification about every script error – Uncheck it

Apply

OK

or.....

Problems accessing secure sites/ cannot install 128 bit encryption

http://inetexplorer.mvps.org/answers2.htm#secure_sites

or.....

Courtesy of Ramesh –

Click Start, Run and type this command

REGSVR32 JSCRIPT

This should fix all or most of the said problems.

Then see below:

Where to get the JAVA VM

<http://www.microsoft.com/mscorp/java/?gssnb=1>

or

Re: IE PopUp Windows won't open with SP2

microsoft.public.windows.inetexplorer.ie6.browser: Re: IE PopUp Windows won't open with SP2

http://inetexplorer.mvps.org/answers_9.htm#java

You can try updating your scripting engine. The latest scripting engine can be found at:

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

(98, ME, NT4.0) For 2000 and XP go to

<http://www.microsoft.com/downloads/details.aspx?FamilyID=c717d943-7e4b-4622-86eb-95a22b832caa&DisplayL>

and you can test Javascript here:

<http://www.dancespots.net/browsertest.htm>

Java VM: http://www.mvps.org/inetexplorer/answers_9.htm#java2

Sun version

<http://java.sun.com/getjava/installer.html>

MSJVM Transition FAQ

<http://www.microsoft.com/mscorp/java/faq.asp>

Also read.....

Courtesy of Jim Byrd:

There is good information concerning all aspects of the Java situation here:

<http://www.javatester.org/installing.html>

Be aware, however, that after Dec 31, 2007, MS will apparently no longer be distributing Java or providing any support for Java including security fixes. See here: <http://www.microsoft.com/mscorp/java/> so you might want to start thinking about the future.

You can get the Sun Java J2SE RunTimes or SDK here:

<http://java.sun.com/downloads/index.html> (all versions – select using the dropdown)

Sun also offers an automatic download and install of the 1.4 Java plug-in here: <http://java.sun.com/getjava/download.html>

For the MS Java VM, you may need to install v.3805 or v.3809 prior to upgrading to v. 3810 if you didn't previous have MS Java v. 3805 or 3809 installed.

For all other OS's:

Download and install the MS Java VM v. 3809 from one of the links here:

<http://ftp.idilis.ro/windows/sp/jvm98/msjavwu.exe>, or here:

<http://secinfo.huji.ac.il/patches/Win-xp/msjavwu.exe>

Then upgrade to v. 3810:

microsoft.public.windows.inetexplorer.ie6.browser: Re: IE PopUp Windows won't open with SP2

For all OS's except Win2kSP4 obtain v. 3810 here:

<http://fileforum.betanews.com/detail.php3?fid=1050022631> ,or here:

http://download.windowsupdate.com/msdownload/update/v3-19990518/cabpool/MSJavWU_8073687b82d41db93f4c

Both Java VM's can co-exist on your machine quite nicely. Just select which one you want to use in Tools|Internet Options|Advanced and restart all IE browsers. Here, courtesy of Michel Gallant, MVP Security, is a tiny utility which allows you to toggle and view status of your current Java VM vendor associated with IE:

<http://www.jensign.com/JavaScience/SelectIEJVM/index.html>

A note from Mitch Gallant:

"One note about the JVM Selector utility: If/when you install a new version of Sun J2SE, you need to manually select to have Sun JVM as default JVM for IE (in install), or after install via the JavaPlugin control panel. This generates the necessary win32 registry entries, which must be present for the utility to know about JavaPlugin. After that, the utility should work properly."

MSJVM Transition FAQ

<http://www.microsoft.com/mscorp/java/faq.asp>

or.....

Do you have the JavaScript plug-in installed?

<http://java.sun.com/webapps/download/AutoDL?BundleId=9567>

or.....

You might also try installing the Windows Script 5.6 for Windows 2000 and XP if you have not already done so. The install includes a new jscript.dll

<http://www.microsoft.com/downloads/details.aspx?FamilyId=C717D943-7E4B-4622-86EB-95A22B832CAA&disp>

or.....

1. You might want to refresh your scripting engine:

<http://msdn.microsoft.com/library/default.asp?url=/nhp/default.asp?contentid=28001169>

or

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

Sometimes there's a corrupt file in the cache and one must go to Tools | Internet Options and click Delete Files.

2a. Start>Run>Regsvr32 vbscript.dll

2b. Start>Run>Regsvr32 jscript.dll

(WinXP users who have problems with 2a and 2b, see

http://www.mvps.org/inetexplorer/answers_9.htm)

Re: IE PopUp Windows won't open with SP2

microsoft.public.windows.inetexplorer.ie6.browser: Re: IE PopUp Windows won't open with SP2

3. Re-register all DLLs listed in <http://support.microsoft.com/?kbid=281679>

4. See also

Error Message When You Browse the Web: An Error Has Occurred in the Script on This Page

<http://support.microsoft.com/?kbid=306831>

5a. IE Tools>Internet Options>Advanced>Browsing>Enable third-party browser extensions (uncheck & reboot).

5b. Find the hijacker that caused 5a to be checked (or if none were checked, check for hijackware anyway):

Dealing with Hijackware

Archive: Java 2 SDK, Standard Edition (J2SE), v 1.4.1_01

http://java.sun.com/products/archive/j2se/1.4.1_01/

Msjava.dll – Explorer caused an exception c0010000X in module
This problem can occur if the Microsoft Java Virtual Machine (VM) is damaged. To work around this problem, install a new copy of the Java VM from the following Microsoft Web site:

<http://www.microsoft.com/java/>

or

<http://support.microsoft.com/?kbid=232803>

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
