Hi Emmett :-)

Here is a bit more information on this issue:

Pictures Do Not Show

<http://www.fjsmjs.com/IE/redx.htm>

or.....

Right click on the graphic you see and a pop up menu should appear. Select "Show Picture" option.

Then, go to Internet Options>Advanced Tab
Show Pictures – check option if
unchecked to display pictures all the time.

or

Scroll down to this section at this link.:

I can't see JPG's or GIFS any more – red x – images missing – fuzzy
images/distorted images

Or... from

<http://msdn.microsoft.com/library/default.asp?url=/workshop/author/dhtml/overview/highdpi.asp>

How to Activate Scaling

Internet Explorer 6 and later automatically adjusts the scale on higher resolution systems when the DPI setting is higher than 96 DPI and the "UseHR" registry value is added to the registry. These are usually done by the manufacturers of higher resolution systems.

Set the DPI

These are the steps for changing the DPI setting on your system.

Right-click the Windows desktop to display the context menu.

Click Properties on the context menu to display the Display Properties dialog.

Click the Settings tab on the Display Properties dialog to display the Settings tab.

Click the Advanced button on the Settings tab to display the monitor properties dialog.

Select a DPI setting in the Display frame of the monitor properties dialog to change the DPI setting.

Restart your system to allow the changes to take effect.

Run REGEDIT to add the UseHR Registry Entry

The UseHR value is added to the Main key under "Internet Explorer" as follows:

HKEY_CURRENT_USER

Software

Microsoft

Internet Explorer

Main

UseHR= dword:00000001

If the solution from Dell support works for you, don't bother with the registry fix from msdn.

It is difficult for us to determine the right information to provide for your problem with out more details, such as the version of Windows you are using, if you have SP2, and the exact wording of any error messages you may be getting. This will help us determine the proper information to provide you to make the necessary corrections to resolve your problem. Please post back with this information and we'll try to get your problem resolved.
