Hi me :-)

- > *OK, can i uninstall IE6 without affecting outlook express ? I dont*
- > *want it to uninstall OE and end up losing all my emails.*
- > *IE has been acting up ,not showing background images for*
- > *example(unless someone knows how to get them to show),so i dont know*
- > *whether to use the IE updates,or uninstall and reinstall it*

Since you did not post necessary information such as the version of Windows or IE you are using, I can only make a general suggestion. You might try the following and see if it helps:

I can't see JPG's or GIFS any more – red x – images missing – fuzzy images/distorted images

[http://inetexplorer.mvps.org/answers.htm#jpg\\_gif](http://inetexplorer.mvps.org/answers.htm#jpg_gif)

or.....

Register these files:

1. Click on Start --- Run
2. Type Regsvr32 softpub.dll
3. Click OK

and.....

Script Debugging Problem

Open IE

Tools | Advanced

Under Browings:

Disable Script Debugging – Check it

Display a notification about every script error – Uncheck it

Apply

OK

microsoft.public.windows.inetexplorer.ie6.browser: Re: If i download latest OE6 updates, will it update OE also ?

or.....

Problems accessing secure sites/ cannot install 128 bit encryption

[http://inetexplorer.mvps.org/answers2.htm#secure\\_sites](http://inetexplorer.mvps.org/answers2.htm#secure_sites)

or.....

Courtesy of Ramesh –

Click Start, Run and type this command

REGSVR32 JSCRIPT

This should fix all or most of the said problems.

[http://www.mvps.org/inetexplorer/answers.htm#new\\_window](http://www.mvps.org/inetexplorer/answers.htm#new_window)

Then see below:

Where to get the JAVA VM

<http://www.microsoft.com/mscorp/java/?gssnb=1>

or

[http://inetexplorer.mvps.org/answers\\_9.htm#java](http://inetexplorer.mvps.org/answers_9.htm#java)

You can try updating your scripting engine. The latest scripting engine can be found at:

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

(98, ME, NT4.0) For 2000 and XP go to

<http://www.microsoft.com/downloads/details.aspx?FamilyID=c717d943-7e4b-4622-86eb-95a22b832caa&DisplayL>

and you can test Javascript here:

<http://www.dancespots.net/browsertest.htm>

Java VM: [http://www.mvps.org/inetexplorer/answers\\_9.htm#java2](http://www.mvps.org/inetexplorer/answers_9.htm#java2)

Sun version

<http://java.sun.com/getjava/installer.html>

Re: If i download latest OE6 updates, will it update OE also ?

MSJVM Transition FAQ

<http://www.microsoft.com/mscorp/java/faq.asp>

Also read.....

Courtesy of Jim Byrd:

There is good information concerning all aspects of the Java situation here:

<http://www.javatester.org/installing.html>

Be aware, however, that after Dec 31, 2007, MS will apparently no longer be distributing Java or providing any support for Java including security fixes. See here: <http://www.microsoft.com/mscorp/java/> so you might want to start thinking about the future.

You can get the Sun Java J2SE RunTimes or SDK here:

<http://java.sun.com/downloads/index.html> (all versions – select using the dropdown)

Sun also offers an automatic download and install of the 1.4 Java plug-in here: <http://java.sun.com/getjava/download.html>

For the MS Java VM, you may need to install v.3805 or v.3809 prior to upgrading to v. 3810 if you didn't previous have MS Java v. 3805 or 3809 installed.

If your OS is Win2000 SP2, SP3 but NOT SP4 then you can download and install the MS Java VM v. 3809 from here:

[http://download.windowsupdate.com/msdownload/update/v3-19990518/CabPool/O810030\\_W2K\\_510A502BA8F9B6](http://download.windowsupdate.com/msdownload/update/v3-19990518/CabPool/O810030_W2K_510A502BA8F9B6)  
or here:

[http://www.biologylab.awlonline.com/MSJavaVM/Software/en/com\\_microsoft.windows2000/x86win2k/com\\_microsoft](http://www.biologylab.awlonline.com/MSJavaVM/Software/en/com_microsoft.windows2000/x86win2k/com_microsoft)

For Win2000 SP4, you'll need to re-install v.3805, from here:

<http://www.download.support.safetec.net/msjavx86/msjavx86.exe>

<http://www.mvps.org/inetexplorer/msjavx86.exe>

For all other OS's:

Download and install the MS Java VM v. 3809 from one of the links here:

<http://ftp.idilis.ro/windows/sp/jvm98/msjavwu.exe>, or here:

<http://secinfo.huji.ac.il/patches/Win-xp/msjavwu.exe>

Then upgrade to v. 3810:

For all OS's except Win2kSP4 obtain v. 3810 here:

<http://fileforum.betanews.com/detail.php3?fid=1050022631> ,or here:

[http://download.windowsupdate.com/msdownload/update/v3-19990518/cabpool/MSJavWU\\_8073687b82d41db93f4c](http://download.windowsupdate.com/msdownload/update/v3-19990518/cabpool/MSJavWU_8073687b82d41db93f4c)

For Win2k – SP2, SP3 – you can also obtain v. 3810 from Microsoft here:

[http://download.microsoft.com/download/5/7/7/577b7277-227d-4163-9b18-423356321682/O816093\\_W2K\\_SP4\\_X](http://download.microsoft.com/download/5/7/7/577b7277-227d-4163-9b18-423356321682/O816093_W2K_SP4_X)

Re: If i download latest OE6 updates, will it update OE also ?

microsoft.public.windows.inetexplorer.ie6.browser: Re: If i download latest OE6 updates, will it update OE also ?

For Win2kSP4, to get 3810 from Microsoft you now have to get Q816093 from Windows Update Catalog – use the entry for Windows 2000 SP4 (this seems to be the only Win2k option that has it) and then find 816093 in the list. You can find directions for using the Windows Update Catalog functions here: <http://support.microsoft.com/default.aspx?scid=kb:EN-US:323166>. (I am informed by Torgeir Bakken, MVP, that if you rename the downloaded file from here: <http://fileforum.betanews.com/detail.php3?fid=1050022631> to msjavwu.exe it will then also work for SP4.)

Both Java VM's can co-exist on your machine quite nicely. Just select which one you want to use in Tools|Internet Options|Advanced and restart all IE browsers. Here, courtesy of Michel Gallant, MVP Security, is a tiny utility which allows you to toggle and view status of your current Java VM vendor associated with IE:  
<http://www.jensign.com/JavaScience/SelectIEJVM/index.html>

A note from Mitch Gallant:

"One note about the JVM Selector utility: If/when you install a new version of Sun J2SE, you need to manually select to have Sun JVM as default JVM for IE (in install), or after install via the JavaPlugin control panel. This generates the necessary win32 registry entries, which must be present for the utility to know about JavaPlugin. After that, the utility should work properly."

MSJVM Transition FAQ  
<http://www.microsoft.com/mscorp/java/faq.asp>

or.....

Do you have the JavaScript plug-in installed?  
<http://java.sun.com/webapps/download/AutoDL?BundleId=9567>

or.....

You might also try installing the Windows Script 5.6 for Windows 2000 and XP if you have not already done so. The install includes a new jscript.dll  
<http://www.microsoft.com/downloads/details.aspx?FamilyId=C717D943-7E4B-4622-86EB-95A22B832CAA&disp>

or.....

1. You might want to refresh your scripting engine:  
<http://msdn.microsoft.com/library/default.asp?url=/nhp/default.asp?contentid=28001169>  
or  
<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

Sometimes there's a corrupt file in the cache and one must go to Tools | Internet Options and click Delete Files.

2a. Start>Run>Regsvr32 vbscript.dll

Re: If i download latest OE6 updates, will it update OE also ?

microsoft.public.windows.inetexplorer.ie6.browser: Re: If i download latest OE6 updates, will it update OE also ?

2b. Start>Run>Regsvr32 jscript.dll

(WinXP users who have problems with 2a and 2b, see  
[http://www.mvps.org/inetexplorer/answers\\_9.htm](http://www.mvps.org/inetexplorer/answers_9.htm))

3. Re-register all DLLs listed in <http://support.microsoft.com/?kbid=281679>

4. See also

Error Message When You Browse the Web: An Error Has Occurred in the Script on This Page

Try turning on prompts for Cookies and Active Scripting so you can tell if  
anything is happening. You could also open the TIF viewer and see if you  
already received it. Make your view Details and order by Last Accessed.  
The Cookie appears as a txt file. There is also a request to use ActiveX  
which I couldn't see where it was being used but there is a script which  
checks whether the browser can handle Shockwave Flash so I suspect there may  
be check for it  
which I missed somewhere.

The point is that all of that gets done before the page starts being  
rendered; so either your User-Agent string or your version of Flash may be  
affecting what else is being loaded and it may be that which is causing the  
404.

If you don't want to bother with prompting you would also get a different  
result simply by using the Security tab slider and setting it to High.

Re: If i download latest OE6 updates, will it update OE also ?

microsoft.public.windows.inetexplorer.ie6.browser: Re: If i download latest OE6 updates, will it update OE also ?

Don't forget to set your security settings back to whatever they were (e.g. click Default) after testing. ;)

or .....

Flash & Shockwave not working

A few of things could contribute to the problem. Have you checked your firewall to see if the ad-blocker or Flash blocker is set to on or block?

Also, there are several Pop-up blockers that will block Flash unless you turn it off. I had POP-UP Blocker and it would not open Flash at all, and it took me a while to figure out what was doing it When I unchecked the Kill Flash it stopped.

Some Flash has pop-ups and the blockers will see them as ads or and kill it any way.

Also, if you have SpywareBlaster installed, be sure you have Kill Flash unchecked – Open SpywareBlaster – Tools – Click on Flash Killer then uncheck "Switch off Flash Player" or in v3.1 Disable and block Macromedia Flash (4X 5X & 6X) in Internet Explorer.

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
