Hi Jan,

Thank you for the numerous things to try. I found a ton of useful information and programs I can use. Unfortunately although tryin most of the steps recommended in your post nothing seemed to work.

To be more specific my problem seems to be only with the status bar when using window.open() command. I set the "status=no" in my code, but when I launch that from XP SP2 computer the status bar is there, even though running Moxilla browser on the same computer respects the setting. Also hitting the same page and klikcing on the same link from another computer which still doesn't have SP2 IE also respects the setting. It is as if the "status=no" is being ignored by XP SP2 IE.

I do not get any JavaScript erros on any browser what so ever.

Could it be a Bug?

Thanks

Tuukka
