Jan,

I went down the list and nothing I did seemed to make a difference.

1. I am not having a problem with javaScript
2. I am allowing active content
3. 128 bit IE is enabled
4. I installed Windows script 5.6
5. I changed my Http v1.1 to go thru proxy settings

I am still getting the original message "Page cannot be displayed." Any other suggestions?

Tks,
Wigi

>> Here is my setup:

>> 1. I have a home network setup with a proxy server

>> (WinProxy).

>> 2. There are 3 PCs on the network, all running WinXP

Re: IE6 cannot access secured sites after SP2 install

SP2.

>> 3. Only the Proxy host PC can access the "https" sites.
>> 4. The 2 client PCs cannot access a secured site. "Page cannot be displayed" is the msg rcvd.
>> 5. I have looked in this newsgroup for help and I have tried:
>> First clear the cache (Temporary Internet Files) and History from IE> Tools> Internet Options> General> Delete files (and delete offline content.) It's often recommended that the TIF folder be kept at about 50 MB (Settings.)
>> Go to your Cookies folder and delete any cookies from those sites.
>> If clearing the cache and History didn't work, delete the TIF and History folders See: <http://mvps.org/winhelp2002/delcache.htm>
>> There are many other possible solutions at <http://www.mvps.org/inetexplorer/answers.htm#dns>
>> Does anyone have any suggestions??
>> TIA
