Hi puffnbrew :-)

You may have some files that have been damaged or corrupted during the process. In addition to the information on how to repair/reinstall IE I have already provided here, you might try the information below that may offer more details to resolving your problem.

Error Message: Iexplore.exe Has Generated Errors and Will Be Closed By Windows

<http://support.microsoft.com/?kbid=303728>

Internet Explorer Repair Tool

<http://support.microsoft.com/?kbid=194177>

or

<http://www.aumha.org/win5/kbie.htm>

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
