Hi help me :-)

'k...here are a few things to try to let us know where we are here. There are several things that can cause this type of error with XP and SP2.

To download Java VM for XP:

Download the Microsoft Java VM for Windows XP here

<http://windowsupdate.microsoft.com>

Allow active content to run in files on My Computer – Windows XP Service

Pack 2:

or.....

You might want to refresh your scripting engine:

or

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

Windows Script 5.6 for Windows 2000 and XP

and.....

You can get the Sun Java J2SE RunTimes or SDK here:
<http://java.sun.com/downloads/index.html> (all versions – select using the dropdown)

or here: http://www.java.com/en/download/windows_automatic.jsp

Sun also offers an automatic download and install of the 1.4 Java plug-in here: <http://java.sun.com/getjava/download.html>

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
