Hi Suz-Anne :-)

Yes, there are lots of folks here who don't share the US holidays, and vice versa, but, there is someone, usually several, manning the crows nest at all times. It helps us make a faster determination of the resolution if there is information presented by the poster, and 'ME TOO' type posts are very hard to follow for everyone.

And, yes, the information I presented for Donald will work for your problem too. :-)

Now, as for uninstalling SP2....

Try the following and see if it helps:

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
