Hi MiniMe :-)

As you do not mention the version of Windows or IE you are using, I'll have to guess, so try the following information and see if it helps:

Resetting the DPI

<http://archives.hwg.org/hwg-style/200003031517.IAA04376@hwg.org>

Resetting Your Display to use Small Fonts

<http://www.blueoxforestry.com/RILSIM/small-fonts.htm>

(You can play with this here until you find the setting you want)

How do I change screen resolution and/or font size using Windows XP?

<http://support.academic.com/academicknowbase/root/public/acdm9150.htm>

Adjusting Scale for Higher DPI Screens

<http://msdn.microsoft.com/library/default.asp?url=/workshop/author/dhtml/overview/highdpi.asp>

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)

Smiles are meant to be shared,  
that's why they're so contagious.
