Hi Jean Claude :-)

Try the following and see if it helps. I have provided information for each of the two parts below, starting with the JavaScript:

- > 1. *Java Scripts do not work.*
- >
- > *Script has been abled in the browser configuration*
- > *Java Machine has been downloaded*

Your current Security settings prohibit running ActiveX Controls

Set your Security to Med.

View the Browsers How-to regarding updating your browser security settings.

http://www.auburn.edu/oit/support/employees/browsers/ht_ie6_browser_medium_security.php
and setting your browser to medium-level security

also..

Allow active content to run in files on My Computer – Windows XP Service

Pack 2:

<http://www.winxptutor.com/lmzunlock.htm>

Zone Err Msg: Your Current Security Settings Prohibit Running ActiveX Controls on This Page...

<http://support.microsoft.com/kb/q223310/>

also.....

Click Star Click on Start -- Run

Type Regsvr32 softpub.dll

and

REGSVR32 JSCRIPT

Click OK

and...

microsoft.public.windows.inetexplorer.ie6.browser: Re: Java Scripts and flash 5 plugin

Go to Tools | Internet Options | Advanced.

Check the box to Disable script debugging.

Uncheck the box to Display a notification about every script error.

Disable the Script Debugger in IE (Line 142) – Win XP

http://www.kellys-korner-xp.com/xp_tweaks.htm

1. You might want to refresh your scripting engine:

<http://msdn.microsoft.com/library/default.asp?url=/nhp/default.asp?contentid=28001169>

or

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>

Windows Script 5.6 for Windows 2000 and XP

<http://www.microsoft.com/downloads/details.aspx?FamilyID=c717d943-7e4b-4622-86eb-95a22b832caa&DisplayL>

Sometimes there's a corrupt file in the cache and one must go to Tools | Internet Options and click Delete Files.

2a. Start>Run>Regsvr32 vbscript.dll

2b. Start>Run>Regsvr32 jscript.dll

(WinXP users who have problems with 2a and 2b, see

http://www.mvps.org/inetexplorer/answers_9.htm)

3. Re-register all DLLs listed in <http://support.microsoft.com/?kbid=281679>

4. See also

For this problem:

> 2. *Sites requiring flash 5 plugin do not load*

>

> *Have downloaded the plugin and the latest plugin several times*

Flash & Shockwave not working

A few of things could contribute to the problem. Have you checked your firewall to see if the ad-blocker or Flash blocker is set to on or block?

Also, there are several Pop-up blockers that will block Flash unless you turn it off. I had POP-UP Blocker and it would not open Flash at all, and it took me a while to figure out what was doing it When I unchecked the Kill Flash it stopped. Some Flash has pop-ups and the blockers will see them as ads or and kill it any way.

Also, if you have SpywareBlaster installed, be sure you have Kill Flash unchecked – Open SpywareBlaster – Tools – Click on Flash Killer then uncheck "Switch off Flash Player" or in v3.1 Disable and block Macromedia Flash (4X 5X & 6X) in Internet Explorer.

or.....

Disable Flash Player

See: Disable Flash: <http://faq.ozoneasylum.com/446/>

or.....

Remove Flash, including all registry entries for it. Reboot then go to Macromedia's site. Since it is Flash based you should get the dialog to install Flash. Use the removal information at their site here:

<http://www.macromedia.com/support/flash/ts/documents/playerfaq.htm#remove>

Re: Java Scripts and flash 5 plugin

microsoft.public.windows.inetexplorer.ie6.browser: Re: Java Scripts and flash 5 plugin

and

Macromedia's Support & Training

<http://www.macromedia.com/support/>

or.....

Enable Flash in SP2

Internet Options> Advanced> Security> Check "Allow active content to run in files on My Computer"

You will, of course, be giving up some of the security provided by SP2.

You can also make My Computer visible in Internet Options> Security to allow additional tweaking.

See <http://www.phdcc.com/xpsp2.htm> >>> "Showing the "My Computer" security zone"

also.....

Allow active content to run in files on My Computer – Windows XP Service Pack 2:

<http://www.winxptutor.com/lmzunlock.htm>

Information bar appears when you open PDF files locally in Internet Explorer

(Windows XP SP2)?:

<http://www.mvps.org/sramesh2k/ie/ielocalpdf.htm>

If these steps do not resolve your problem, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
