First eliminate any scumware.

CAUTION!!!! Before you try to remove spyware using any of these programs , download a copy of LSPFIX from any of the following sites:

<http://www.cexx.org/lspfix.htm>

<http://www.spychecker.com/program/winsockxpfix.html>

(if your OS is Win2k or XP) The process of removing certain malware may kill your internet connection. If this should occur, this program, LSPFIX, will enable you to regain your connection.

See

Dealing with Unwanted Malware, Parasites, Toolbars and Search Engines

<http://mvps.org/winhelp2002/unwanted.htm>

Note that AdAware and SpyBot S & D will each catch some things the other won't. Also, each needs to be updated with the program's update function before every use, even when just downloaded. There's also a lot more to do than just those two programs. CWS shredder is also available here:

http://www.kellys-korner-xp.com/regs_edits/cwshredder.zip

**Post your HijackThis log to

<http://www.spywareinfo.com/forums/>

<http://forums.tomcoyote.org/>

<http://www.wilderssecurity.com/> or the Spyware forum at

<http://forum.aumha.org/viewforum.php?f=30> for expert analysis, not here.**

Alternative download pages for Ad-Aware, Spybot, HijackThis and CWS shredder may be found on this page:

<http://aumha.org/a/parasite.htm>.

microsoft.public.windows.inetexplorer.ie6.browser: Re: IE6 Shuts Down after loading page

See this link for information about malware:

<http://arstechnica.com/articles/paedia/malware.ars>

If nothing there helps, please post back to this thread.
