Hi LT :-)

Try the following and see if it helps:

IE Images and Pictures or Red X in Internet Explorer

<http://www.colba.net/~hlebo49/ieimage.htm#IMAGEREDX>

or.....

Red X Instead of Images –

Can not see or save Images/Pictures
Fuzzy Text and fuzzy web graphics

Change the DPI setting from Large to Normal and see if that helps.

I can't see JPG's or GIFS any more – red x – images missing – fuzzy
images/distorted images

http://inetexplorer.mvps.org/answers.htm#jpg_gif

or .

<http://www.fjsmjs.com/IE/redx.htm>

Also..

If you have Zone Alarm, Uncheck "remove private headers" for all
sites.

or.....

To restore the default file association, go to

http://www.dougknox.com/xp/file_assoc.htm

Download, unzip and merge the REG file, "JPE/JPG/JPEG Association Fix"

Some image/graphics programs will change file associations.

or.....

microsoft.public.windows.inetexplorer.ie6.browser: Re: Mot all web page being displayed

Try clearing the IE cache. I.E./Tools/Options/General/Delete files (and delete offline content.)

also

820286 – PRB Windows XP Does Not Natively Support High-DPI Screens

<http://support.microsoft.com/?kbid=820286>

http://forums.us.dell.com/supportforums/board/message?board.id=insp_video&message.id=79881

Less common:

828682 – JPEG images appear distorted in Internet Explorer 6

<http://support.microsoft.com/?kbid=828682>

also.....

You might also try this fix. Although it worked for a few others, it may not work for you, but, it may be worth a try. But, be sure to back up your Registry before you try this:

Open Regedit

Open \HKLM\SOFTWARE\Classes\PROTOCOLS\Name-Space Handler\

Delete the keys "http", "https", and "ftp"

Leave the 'mk' key

The mk key is created by Windows and the others may be created by some other dnld or type manager.

also.....

Pictures Do Not Show

<http://www.fjsmjs.com/IE/redx.htm>

or.....

Right click on the graphic you see and a pop up menu should appear. Select "Show Picture" option.

Then, go to Internet Options>Advanced Tab

Show Pictures – check option if

unchecked to display pictures all the time.

or.....

Scroll down to this section at this link.:

I can't see JPG's or GIFS any more – red x – images missing – fuzzy images/distorted images

microsoft.public.windows.inetexplorer.ie6.browser: Re: Mot all web page being displayed

I

or.....

Web Page Displays an Image As a Red X or Not at All (Q283807)

<http://support.microsoft.com/?kbid=283807>

<http://www.generation.net/~hleboeuf/ieimage.htm>

Can't View Some Graphics on IE/AOL

If you have Norton Personal Firewall or some other ad-blocking software or popup stoppers installed, try disabling this type of software temporarily to see whether this could be the problem. Many of these programs block Javascript, which is often used to pop up login windows and create rollover graphics. Norton Security, for example, is known to block any image that originates from another server (advertisement images usually do), and I'm guessing it also blocks at least some Javascript.

Set the following –

Under Security

Java Medium

Display mixed content-prompt is checked

Under Scripting

Scripting of Java applets

Is set to Enable

Privacy settings are medium

Check if your encoding setting in IE. To do this, click on View / Encoding, and make sure Western European is selected.

For AOL problems:

1) AOL --> Settings --> Preferences --> Internet Properties (WWW)

2) AOL Users with different versions:

* AOL 5.0 and below:

AOL Internet Properties --> Web Graphics --> Used Compressed Graphics

Be sure to Uncheck (which means NO check/mark).

* AOL 6.0:

AOL Internet Properties --> Web Graphics

Be sure to choose never compress graphics.

3) Click General tab (at top left-side corner of AOL Internet Properties).

4) Click Delete Files under Temporary Internet Files and then press OK button to delete all items in the Temporary Internet Files folder.

5) Click Clear History under History and then press OK/Yes button to delete all items in your History folder.

6) Press OK button (at the bottom) to save changes and close your AOL browser.

7) Restart your computer and then get back to AOL.

Re: Mot all web page being displayed

microsoft.public.windows.inetexplorer.ie6.browser: Re: Mot all web page being displayed

More info about the problem can be obtained at
<http://esteepinky.cjb.net/aol/aolnote.htm>

If all the above fails, Repair your IE, then SHUT DOWN your machine, don't just restart, then restart your machine.

If these steps do not resolve your problem, or you need help with the above, please post back to this thread with the details and any error messages.

Hope this helps

Jan :)
