Hi, Robert.

Thanks for the suggestion.

>When I had that problem I could use OE to save the full content.
>E.g. use File, Send, Page by E-mail then in OE (assuming Rich Text (HTML)
>is its default for composing E-mail) do a File, Save As... and use .mht
>as a file extension instead of .eml

Sending to OE is not necessary. I can already save as a "Web Page, HTML only", as a "Web Archive, single file", and as a "Text File" right from IE.

I can't, though, save as a "Web Page, complete".

regards, Andy
