Hi Kevin :-)

Try the following and see if it helps:

Cannot access just one site

Cannot browse certain websites

<http://www.dslreports.com/faq/10082>

Also..... try adding the site to your Trusted Zone.

or..

Go to the following and open with Notepad,
C:\WINDOWS\hosts (the one with no extension (not the .SAM one)
then delete any listing reference for the site you are trying to open.
Then Save and close.

and...

Internet Explorer Cannot Connect to Secure Web Sites

<http://www.helpwithwindows.com/WindowsXP/troub-10.html>

Cannot Connect to Secure Sites

<http://www.duxcw.com/faq/win/xp/secure.htm>

or....

Why can't I browse certain websites

<http://www.dslreports.com/faq/10082>

Hope this helps :-)

Jan :)
