Hi,

Adding to Vanguard's post...

Copy and paste the text between the dashes into a notepad file. Name it UseHR.reg Save. Right-click> Merge, to merge it into the registry. Then try different DPI settings.

-----  
Windows Registry Editor Version 5.00

```
[HKEY_CURRENT_USER\Software\Microsoft\Internet Explorer\Main]
"UseHR"=dword:00000000
```

-----  
More info at:

820286 – PRB Windows XP Does Not Natively Support High-DPI Screens

<http://support.microsoft.com/?kbid=820286>
