Hi,

Some possibilities:

Check for a HOSTS file. See: <http://mvps.org/winhelp2002/hosts.htm> and <http://www.accs-net.com/hosts/>

If running a cable modem, dsl modem or router, have you, at some point, shut *everything* down for a few minutes? This sometimes helps.

Try the Internet Options> Security settings at <http://mvps.org/winhelp2002/restricted.htm#Setting>

Clear the IE cache. IE> Tools> Internet Options> General> Delete files (and delete offline content when that dialog pops up) It's often recommended that the TIF folder be kept at about 50 MB (Settings.)

Important...

Check any third-party security programs to see if one of them is blocking this site. Norton Internet Security can cause problems with SP2.

See: http://www.symantec.com/techsupp/nis/nis_2004_info_solve.html

http://www.symantec.com/techsupp/nis/nis_2005_info_solve.html

Or start here <http://www.symantec.com/techsupp/consumer.html>

Many of the steps in this article are worth a try:

870700 – How to troubleshoot problems accessing secure Web pages with IE 6 [XP] SP2: <http://support.microsoft.com/default.aspx?scid=kb:en-us:870700>

Other possibilities at <http://inetexplorer.mvps.org/answers/16.html>

<http://inetexplorer.mvps.org/answers/16.html>

<http://inetexplorer.mvps.org/answers/17.html>

Hope this helps,

Don
