Brian Anderson <[BrianAnderson@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:BrianAnderson@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx)> had this to say:

My reply is at the bottom of your sent message:

> I was hoping someone could tell me why all of a sudden when I click  
> on a link, no matter where I am, instead of going to that page I am  
> sent to my yahoo mail page. While it does not happen all the time it  
> happens most of the time. (Even happened here the first time I tried  
> to choose a new questions.) This just started happening on the 23rd.  
> I have not downloaded any  
> programs or made any changes to my system. I have run Norton  
> Anitvirus, Microsoft AntiSpyWare and another SpyWare program and  
> nothing shows up. This is very upsetting since I teach online and  
> some of the links are student papers. If I am sent to my mail page  
> then I cannot download the paper. PLEASE HELP  
> Thank you.  
> Brian

Add/remove in the control panel... Is there an application, down near the bottom, called something like "Yahoo! Mail" in there? You don't have to uninstall the messenger itself but you might have a corrupt Yahoo! Mail (comes with the bloated version of Yahoo! Instant Messenger or at least it did) installation. If you remove it it might resolve itself if that's the problem.
