Hi bearsoxe :-)

I did a scan using ewindo security suite and I believe it cleaned my computer, which of your links do you recommend i use?.

As you have used ewindo, I would recommend that you do the following, to make sure that all the residuals of any scumware that may have been on your system are fully removed. Some types of malware can replicate itself repeatedly if not fully removed, meaning, it can keep coming back, even if your program cleans it, or.....thinks it is cleaned. Following up with HiJackThis is a very important step in insuring your system is free of all scumware.

Download and install HiJackThis:

How to download and install HiJackThis: Win 98-XP
<http://www.bleepingcomputer.com/forums/topict309.html>
or
http://www.download.com/HijackThis/3000-8022_4-10227353.html

Please DO NOT post your log HiJackThis log to this newsgroup. It is important that you go to one of the HiJackThis Support Forums below and allow the experts there to analyze it for you.:

AumHa HiJackThis Forum

HJT - CastleCops
http://castlecops.com/f67-Hijackthis_Spyware_Viruses_Worms_Trojans_Oh_My.html

to allow the experts there to evaluate your log and advise you of any necessary steps to clean your system.

(Note: You will have to Register before posting on these Forums. Please follow all pre-posting instructions carefully to avoid having your log deleted or ignored.

Re: Pop up window when browsing appears

Re: Pop up window when browsing appears

Please post a link back here to the forum where you post your HJT log. We will then be able to follow your progress there. The experts at both forums are excellent, and they will help make sure that your system is fully cleaned.

I will follow along there as well. If you need help, post back. :-)

Hope this helps.

Jan :)

It's understandable. :-) What part of the instructions are you having trouble with, what you did not undertand and I'll try to help you through the steps as best I can.
