Beta testers of IE7 Public Preview are asked to post their comments to `microsoft.public.internetexplorer.general` newsgroup.

On the web:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx?dq=microsoft.public.internetexplorer>

In your newsreader:

<news://msnews.microsoft.com/microsoft.public.internetexplorer.general>

Installed IE7 beta, (not over keen on it compared to Firefox 1.5 BTW) but it's changed all the fonts in both IE and OE. Doesn't seem to be a way of changing them back to the original (if I knew what the original fonts in IE6 were!) Any one got any info on this?
