Hi Mudma :-)

ok...let's try the following and see if it helps:

First, clear the IE cache. IE> Tools> Internet Options> General> Delete files (and delete offline content when that dialog pops up) It's often recommended that the TIF folder be kept at about 50 MB (Settings.)

If you have any 3rd party toolbars such as Google or Yahoo, disable them.

Blank Desktop or Computer Hangs When Internet Explorer Installed [Q184197]
<http://support.microsoft.com/default.aspx?scid=kb;EN-US;Q184197>

also..

Then try these two commands

o to Start> Run and enter the two commands one at a time (or cut and paste), and hit enter after each one. You should see a message that they have registered successfully after each one.

```
regsvr32 vbscript.dll  
regsvr32 jscript.dll
```

Then, refresh your scripting engine. Go to

<http://msdn.microsoft.com/library/default.asp?url=/downloads/list/webdev.asp>
for the appropriate download.

also...

Verify that Internet Explorer Is Using 128-Bit Encryption

To check:

1. In Internet Explorer, on the Help menu, click About Internet Explorer
 2. The level of encryption on your computer appears next to the words Cipher Strength. Verify that the Cipher Strength value appears as 128-bit
- If the Cipher Strength is anything less than 128-bit, download the Internet Explorer High Encryption Pack to your computer's hard disk, and then install it.

Re: IE6 hangs. Finds site and sticks at waiting for a reply....

If you have used SpywareBlaster make sure the Flash Killer is not enabled.

also....

Allow active content to run in files on My Computer – Windows XP Service

Pack 2:

<http://www.winxptutor.com/lmzunlock.htm>

Hope this helps.

Jan :)

Jan,

Unfortunately the problem prevents me from going to any website as every website sticks at the waiting for reply... screen. As for latest drivers I went to the nvidia website on my laptop got them and installed them. No success...

Thanks
